## The Complang Style

- Nicer colors
- Fewer boxes
- More room for your content!

➔ An overall great style for your presentation!

## Example

```
void bubble_sort(int* a, int n) {
    int i,j;
    for (i = 0; i < n; i++) {
        for (j = 0; j < i; j++) {
            if (a[i] > a[j]) SWAP(a[i],a[j]);
        }
    }
}
```

Thank you for using the complang style!
